

ONE PLANTER. LOWER INPUT AND EQUIPMENT COSTS. SAVINGS THAT GO RIGHT TO YOUR BOTTOM LINE!

Precision depth control and spacing in 10", 11", 15", 18" or 19" narrow rows with exclusive, patented KINZE® Push Row Units and Brush-Type Seed Meters.

Exclusive! Patented! Interplant® Push Row Units eliminate the congestion of side-by-side units to give you superior residue flow ... and better balance and weight distribution. Available in solid row Interplant® Packages for Model 3000, 3400, 3500, 3600 and 3650 SDS or Conventional Planters.

More profit!

A higher level of conservation! Combines the proven, superior yield potential of narrow rows with a conservation planting system unequalled in the field today!

No need to add costly toolbars.

Spring-loaded, over-center row unit lockups and handy lockup lever allow you to switch from standard width rows to solid rows and vice versa in minutes. The 3000 "Evolution Series" Row Units provide even greater ground clearance as a result of their higher lockup heights.

3500 Twin-Line® 8 Row N (30")
with solid row Interplant® Package (15 Row 15")

3600 Twin-Line® 16 Row N (30")
with solid row Interplant® Package (31 Row 15")

ADD THE FRONT-MOUNTED DOUBLE FRAME® OPTION TO THE KINZE® 3000 AND YOU HAVE IT ALL!

- **STANDARD WIDTH ROWS. LIQUID OR DRY FERTILIZER. SOLID ROW INTERPLANT® PACKAGES.** All with the same planter, same frame components, same drive system.
- **BOLT-ON 5" x 7" DOUBLE FRAME® TOOLBAR**, mounted parallel to the rear toolbar, makes it possible. Uses formed and welded 24" spacers to handle either liquid or dry fertilizer packages simultaneously with a solid row Interplant® Package.
