

# 3000

## PULL TYPE PLANTER

With the Kinze® 3000 Pull Type Planter you can use Interplant® or apply liquid or dry fertilizer. Handle both Interplant® and fertilizer application by adding the Double Frame® conversion package.

3000 Pull Type with Double Frame Conversion Package, Interplant® Package and Liquid Fertilizer Tanks

### LOWER YOUR INPUT AND EQUIPMENT COSTS.

Available in 4, 6 and 8 row configurations, the rigid, non-flex frame of the 3000 Pull Type planter is perfect for conventional, mulch-till, ridge-till or moderate no-till planting. The 3000 provides the flexibility to either plant narrow rows or apply liquid/dry fertilizer. Or do both when you choose the 3000 Double Frame® conversion package.

### THE KINZE FRAME - The backbone of the 3000.

The 3000 offers you the same stability and performance that you'd expect from any Kinze planter. With the patented Kinze push row units, you have the ability to convert to 15" row spacing in minutes – taking residue and soil flow problems out of narrow row planting. For superior transport clearance, a self-leveling hitch is included with all Interplant packages.

### FERTILIZER OPTIONS

In order to bring better efficiencies to your operation, liquid fertilizer packages are available with total capacity of 220 or 300 gallons (two 110 gallon tanks on the 4 row configuration and two 150 gallon tanks on both the 6 and 8 row configurations). Liquid fertilizer piston pump packages include CDS-John Blue® piston pumps, flow dividers and ground drive system. Select a dry fertilizer package with total capacity of 1,100 or 2,200 lbs. depending on your row configuration.

Fertilizer openers are available for use with any tillage system. Choose from heavy duty, notched single disc or our double disc fertilizer openers. If more depth control is needed, you can add optional notched single disc opener depth/gauge wheels.

### KPM III ELECTRONIC SEED MONITOR

- Available with either magnetic or radar distance sensor options.
- Console features a single LCD to display seed count and alphanumeric planting data.
- Segmented bar graphs display up to 36 rows simultaneously in front/rear or left/right configurations.
- Alphanumeric data includes speed, row spacing, seed spacing (by row or overall average), and seed population (by row or overall average).
- Multiple area counters (40) allow total area and field areas to be compiled.
- Audible alarms and LCD backlighting are all programmable.

## PULL TYPE PLANTER

### SPECIFICATION

Number of Rows	4	6	8
Row Spacing	30"	30"	30"
Weight Empty	2,114 lb.	3,362 lb.	4,746 lb.
Operation Length (Single Frame)	11' 4"	11' 4"	11' 4"
Operation Length (Double Frame)	13' 8"	13' 8"	13' 8"
Operation Width	12' 8"	17' 8"	21' 10"

### KEY FEATURES

- **Double Frame® Conversion Package** – allows planter to be equipped with a combination of the Interplant Package along with the Dry or Liquid Fertilizer Packages.
- **Standard Heavy Duty Row Markers** – equipped with 16" diameter solid marker blades, row markers alternate automatically, have adjustable raise and lower speeds and can be lowered simultaneously.
- **Contact Drive System** – Spring-loaded contact drive tires eliminate mechanical clutches and smooth the engagement and disengagement of the drive – helping to reduce residue, rock and mud problems.
- **Easy Access, End-Mounted Seed Transmissions** – make rate changes simple. No tools are required!
- **Patented Kinze Push Row Units** – provide ability to convert to 15" row spacing in minutes.
- **Self-Leveling Hitch** – included with all Interplant packages for superior transport clearance.
- **Quick-Adjustable Down-Force Springs** – provide four positions of down pressure adjustment.

### MORE OPTIONS

- Double Frame® Conversion Packages
- Electronic Seed Monitor (KPM III)
- Rubber V Closing Wheels
- Cast Iron Closing Wheels
- Quick-Adjustable Down-Force Springs
- Half Rate (2 to 1) Drive Reduction Packages
- Dual Valve Conversion Packages (to operate markers independently of lift system)
- Row Unit Extension Bracket Packages (to accommodate Coulter Mounted Residue Wheel Attachments with HD Single Disc Fertilizer Openers)
- Interplant® Packages
- Interplant® Monitor Packages
- Liquid Fertilizer Packages
  - Two 110 or 150 gallon tanks with lids
  - Liquid Fertilizer Openers
  - Liquid Fertilizer Pumps
- Dry Fertilizer Packages
  - Double Disc, Notched Single Disc or HD Single Disc Fertilizer Opener Packages
