

INTEGRA FIRMWARE UPDATE INSTRUCTIONS:

Before you begin, you will need a USB Memory Stick

1. Click **Firmware Download** for the Monitor you wish to download
2. When the File Download box pops up click on **Save**
3. Another window will pop up and select where you would like to save the .zip file. Default is to your desktop. Click **Save** (Your modem speed will determine how long it will take to download the file)
4. When the download is complete click **Close** on the download window
5. From the Desktop (or location you saved the file in) find the folder with a zipper on it. **Right click** and select **Extract All**.
6. Follow the Extraction Wizard steps. If you do not change where the file is saved to, it will default to save to your Desktop again.
7. Click **Finish**. A window will open with the extracted file. Leave it open.
8. Insert the USB Memory Stick into your computer (a 2nd window will open)
9. Take the file in the Desktop window and copy to the USB Memory Stick window (Left click on the file and drag it between windows OR right click on the file in the Desktop window, select copy, right click in the USB Memory Stick window, right click, select paste)
10. Take the USB Memory Stick out of the computer
11. With monitor display ON, insert the USB Memory Stick into the USB Port on the display
12. Press the USB icon on the Home Screen
13. Press **Upgrade Firmware**
14. Select the firmware version
15. Press the **Green Check**
16. Follow the on-screen instructions
17. When the upgrade is complete, remove the USB Memory Stick from the Monitor

The monitor is now updated and field ready.
